electronic engineers master catalog

VOLUME C

interconnections, packaging, and hardware

30th EDITION

1400 Cabinets, Enclosures, Racks, & Chassis
1600 Chemical Compounds (Adhesives, Cleaners, Coatings, etc.)
1700 Circuit Boards (Printed), Materials, & Accessories
2100 Connectors, Terminals, & Sockets
2400 Panel Hardware (Bezels, Dials, Knobs, etc.)
2500 Mechanical Components
2600 Fans, Blowers, Cooling Equipment, & Heat Exchangers
2800 Hardware (Electronic/Electrical)
2825 Hardware (Mechanical)
3100 Insulators & Insulating Materials
3200 Interconnection Systems (Backpanels, Card Holders, & Packaging Systems)
4200 Prototype Boards, Kits, & Design Aids
4525 Shields & Shielding
4600 Soldering & Desoldering Equipment
5400 Tools (Manual & Power)
6000 Wire & Cable

volume A Electronic components
volume B Electromechanical, electro-optical, and military components
volume D Power sources, instrumentation, computer products, and equipment

Important Notice

Some manufacturers supply pricing information in Electronic Engineers Master. Any such pricing is included solely as a guide and is not intended to be a quotation. All participating manufacturers reserve the right to change specifications and/or prices or to discontinue items without prior notice. While every precaution has been taken to ensure accuracy in content, the publisher cannot be responsible for manufacturers' claims or representations. Nor, can any guarantee be made against the possiblity of error or omission. No portion of EEM may be reproduced by any means without the prior written permission of the publisher.

how to use eem

The 30th edition of EEM is arranged in four volumes each composed of related Product Sections. For user convenience, each volume contains its own Product Index and Directory (green pages) and its own Manufacturers and Sales Offices Directory (yellow pages). Every Product Heading and every Manufacturer of electronic products is listed in each volume. Where, however, the Product Section is assigned to a volume other than that in use, a cross reference is made to the appropriate volume for further information.

To locate a specific product. Start by choosing the volume whose title describes the class of electronic product you are seeking. If you are not sure which volume is appropriate, pick up the first one at hand and find the product heading in the green pages. There you will find either a list of that product's manufacturers or you will be referred to the proper volume. All products are identified by their generic terms. Please read the detailed instructions on the first page of this section. Manufacturers with catalog data in this edition of EEM appear in bold face type and page numbers are shown. Manufacturers appearing in light face type have submitted verifying evidence that they supply the products shown. When you have located a product of interest, turn to the page(s) shown for further information. You will find these pages in each volume in the appropriate sections.

product selection guides

There are 34 Product Selection Guides included in this edition of EEM! They are located on the first pages of the Product Section to which they apply. Use these guides for basic selection parameters and then go to the EEM pages shown in the guide for more detailed information.

product selection index

Product Selection Guide		Vol. A	Vol. B	Vol. C	Vol. D
1100	Amplifier Assemblies, Instrumentation				D•1002

*Product Selection Guide

advertisers' index

To find a specific manufacturer's data pages, an alphabetical index of EEM participants appears in EEM starting on page **A**•4 of Volume **A** and on pages **B**•4, **C**•4 and **D**•4 of the other volumes.

eem 87 88

trademark and logofinder directories

A comprehensive trademark directory is included at the end of the EEM yellow pages in Volume **B**. The EEM logofinder shows the symbols and graphics used by manufacturers as identifiers on their products. Use these pages to locate manufacturers of specific trademarks and logos.

manufacturers' index

In the EEM yellow pages you will find pertinent details on all manufacturers listed in EEM including local sales offices and/or distributors. Please refer to the detailed instructions on the first page of the EEM yellow pages for additional information.

to order a product found in eem

When you have located the product that suits your needs, call the manufacturer or the local sales rep or distributor as shown in the EEM yellow pages. Give the EEM data page number and specs from that page. You and the supplier will be talking on the same wave length which should simplify your ordering and buying.

to file manufacturers' catalogs and data

The EEM File System has been revised and updated. The new EEM File System contains a complete Product Index. This Index tells you where to file which catalog. It also contains a cross-reference so you'll know where catalogs are filed.

In order to use the new EEM File System all you need is a supply of standard letter size, third-cut, manila file folders which are available locally. You then use the pressure sensitive labels which are supplied with the File System to go into as much detail as you want (or need).

Each label fits the third-cut file folder exactly. There are over 300 of these labels in one System: 1 for the index, 1 each for the 62 EEM Product Sections, 24 for the alphabetical file of multiproduct catalogs, plus more than 200 additional labels for System expansion. The System also includes 62 Cross Reference Cards so you can quickly and easily find multiproduct catalogs. The EEM File System is complete and can save you countless hours of time and thousands of dollars. The price? Only $25.00. Send a check to: EEM File System, 645 Stewart Ave., Garden City, NY 11530 and we'll absorb postage and handling. Send a purchase order and add $2.00 for postage and handling. NY and CA residents, please add sales tax.

88 Product Index and Directory

All products are listed alphabetically by their generic names and then by subclassification. For example, look for "Fiber Optic Connectors" under "Connectors, Fiber Optic" or for "Digital Panel Meters" under "Meters, Panel (Digital)."

Following each product heading is a four-digit number directing you to the Product Section where these products are usually cataloged. If that Product Section is not in the EEM volume you are using, a "See Vol. A, B, C, or D" will direct you to the proper volume for your product classification. No numbers appear with cross-reference headings.

Under each product heading whose Product Section appears in the volume you are using, the names of the manufacturers who supply the product are shown in alphabetical order with EEM catalogers shown first in boldface type with appropriate page numbers. Other manufacturers are shown in light face type. The symbol (§) indicates that these products are available from local distributors. The symbol (†) indicates that the product is available to MIL specifications.

Toroids — See Coils, Toroidal (Vol. A)

Torque Control — See Knobs, Torque, Incremental, Ratio Drive (Vol. C)

Torquers, Gyro — See Motors, Torque (Vol. B)

Totalizers, Digital-2200 — *See Vol. D*

Touch Monitors-2000 — *See Vol. D*

Touch Panels-2000 — *See Vol. D*

Touch Terminals-2000 — *See Vol. D*

Tracers, Curve-2900 — *See Vol. D*

Tracers, Signal — See Testers, Signal Tracing (Vol. D)

Trackballs, XY Positioning-2200 — *See Vol. D*

Trackers (MIL), Laser-3475 — *See Vol. D*

Tracking Systems (MIL)-3475 — *See Vol. D*

Trainers (MIL), ECM-3475 — *See Vol. D*

Trainers (MIL), Elint-3475 — *See Vol. D*

Trainers (MIL), EW-3475 — *See Vol. D*

Trainers (MIL), Maritime-3475 — *See Vol. D*

Training Systems (MIL)-3475 — *See Vol. D*

Transceivers-1900 — *See Vol. D*

Transceivers (MIL)-2440 — *See Vol. B*

Transducer Elements-5500 — *See Vol. B*

Transducers, Acceleration — See Accelerometers (Vol. B)

Transducers, Audio-5500 — *See Vol. B*

Transducers, Ceramic-5500 — *See Vol. B*

Transducers, Displacement-5500 — *See Vol. B*

Transducers, Flow-5500 — *See Vol. B*

Transducers, Force-5500 — *See Vol. B*

Transducers, Frequency — See Transducers, Volt, Watt, Current, etc. (Vol. B)

Transducers, Humidity-5500 — *See Vol. B*

Transducers, Incremental Digital Position, Rotary — See Encoders, Shaft Angle (Vol. B)

Transducers, Magnetic Pickup-5500 — *See Vol. B*

Transducers, Magnetostrictive-5500 — *See Vol. B*

Transducers, Piezoelectric-5500 — *See Vol. B*

Transducers, Position, Linear-5500 — *See Vol. B*

Transducers, Position, Rotary-5500 — *See Vol. B*

Transducers, Power — See Transducers, Volt, Watt, Currents, etc. (Vol. B)

Transducers, Pressure-5500 — *See Vol. B*

Transducers, Proximity-5500 — *See Vol. B*

Transducers, Sonic-5500 — *See Vol. B*

Transducers, Strain Gauge-5500 — *See Vol. B*

Transducers, Temperature-5500 — *See Vol. B*

Transducers, Thermoelectric — See Transducers, Temperature (Vol. B)

Transducers, Tilt - Also see Inclinometers-5500 — *See Vol. B*

Transducers, Torque-5500 — *See Vol. B*

Transducers, Ultrasonic-5500 — *See Vol. B*

Transducers, Velocity-5500 — *See Vol. B*

Transducers, Vibration-5500 — *See Vol. B*

Transducers, Volt, Watt, Current VAR, Power Factor, Frequency-5500 — ***See Vol. B***

Transformers, Audio-5600 — ***See Vol. A***

Transformers, Autotransformer-5600 — ***See Vol. A***

Transformers, Bias — See Transformers, Power (Vol. A)

Transformers, Bridging — See Transformers, Matching (Vol. A)

Transformers, Chip-5600 — ***See Vol. A***

Transformers, Chopper-5600 — ***See Vol. A***

SUPER SAVER!

Do you work with ICs? Do you have trouble finding the IC you need? Are you sick and tired of sifting through dozens of manufacturers' data books? Do you have trouble comparing one set of specs to another? Are you sick and tired of wasting time?

Do we have good news for you! Get your hands on a copy of the IC Master. The Master will save you both time and money. Here's how.

The Master list every single IC you can buy. Better yet, the Master lists ICs by *function.* You know what you want to do. The Master tell you who makes what you want to do.

There's more! The Master lists every known alternate source to every intgrated circuit. If somebody makes a substitute for an IC, the Master tell you. And fast!

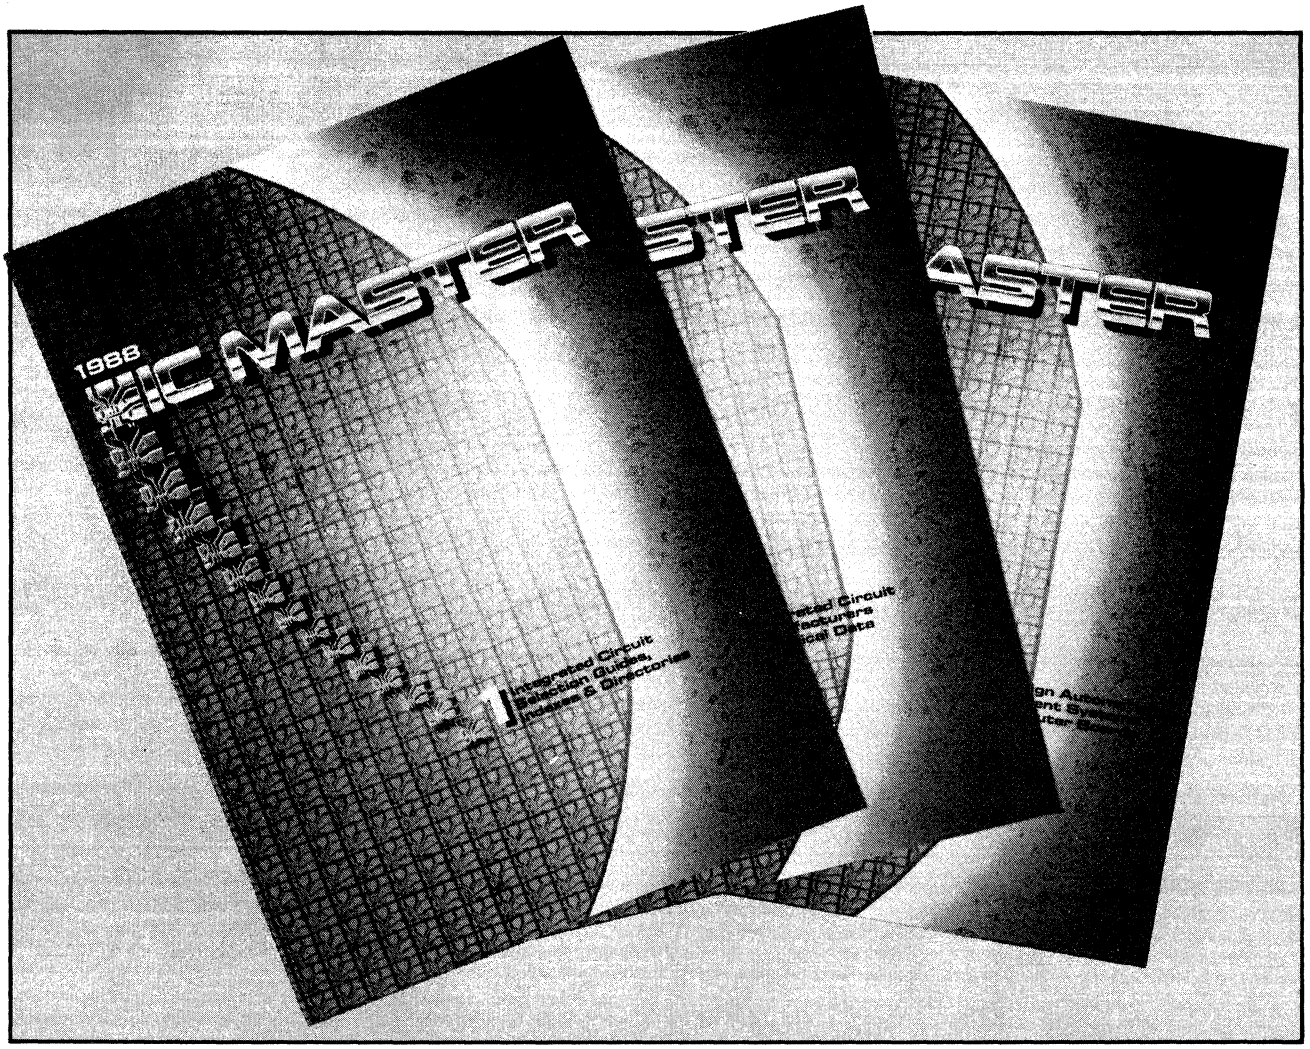
Want to find a custom or semicustom IC? The Master tells you how to go about it. Want to design an ASIC? The Master tells you who makes the tools and how to go about it.

Looking for a distributor or a local sales office? The Master tells you where they are. Got a technical problem? The Master tells you who to call. Can't figure out a part number? The Master tells you how the systems work.

There's more! The Master has a section on microprocessor development tools. There's another section on microcomputer boards. There's a section on applications notes.

If your question has anything to do with integrated circuits, you need the IC Master. Order your copy now. . . . Call 516/227-1300. The operator will answer, "Hearst Business Publishing." Ask for Marie Botta. Tell Marie you need the Master now.

If you prefer, write to Marie, Hearst Business Publishing, 645 Stewart Ave., Garden City, NY 11530. Order forms for the IC Master will be mailed to you promptly.



THE IC's ARE HERE!

Having trouble finding the right integrated circuit? If so, you may be looking in the wrong place. You should be looking for that IC in the IC Master. That's where the ICs are.

Are you spending a lot of time looking through manufacturers' data books trying to find the IC you need? Don't do that. Look in the Master first. The Master will tell you where to find the IC you need. Find it faster with the Master.

The IC Master lists all commercially available integrated ciruits. It's easy to find the IC you need because it is listed in the Master by *function*. You decide what you want done and the Master tells you who makes that IC.

What if what you want done isn't available? No problem. The Master will tell you how to go about designing the exact IC you need. The Master covers ASICs in detail. The Master covers all of the design tools for custom and semicustom ICs.

Do you need an alternate source for an IC you already know about? The Master makes that a snap. Just look in the Alternate Source Directory. If there's an alternate source anywhere it's listed in the Master.

Do you need a development tool for your microprocessor? If anybody has it, the Master knows who it is. The same for microcomputer boards. They're all listed in the Master.

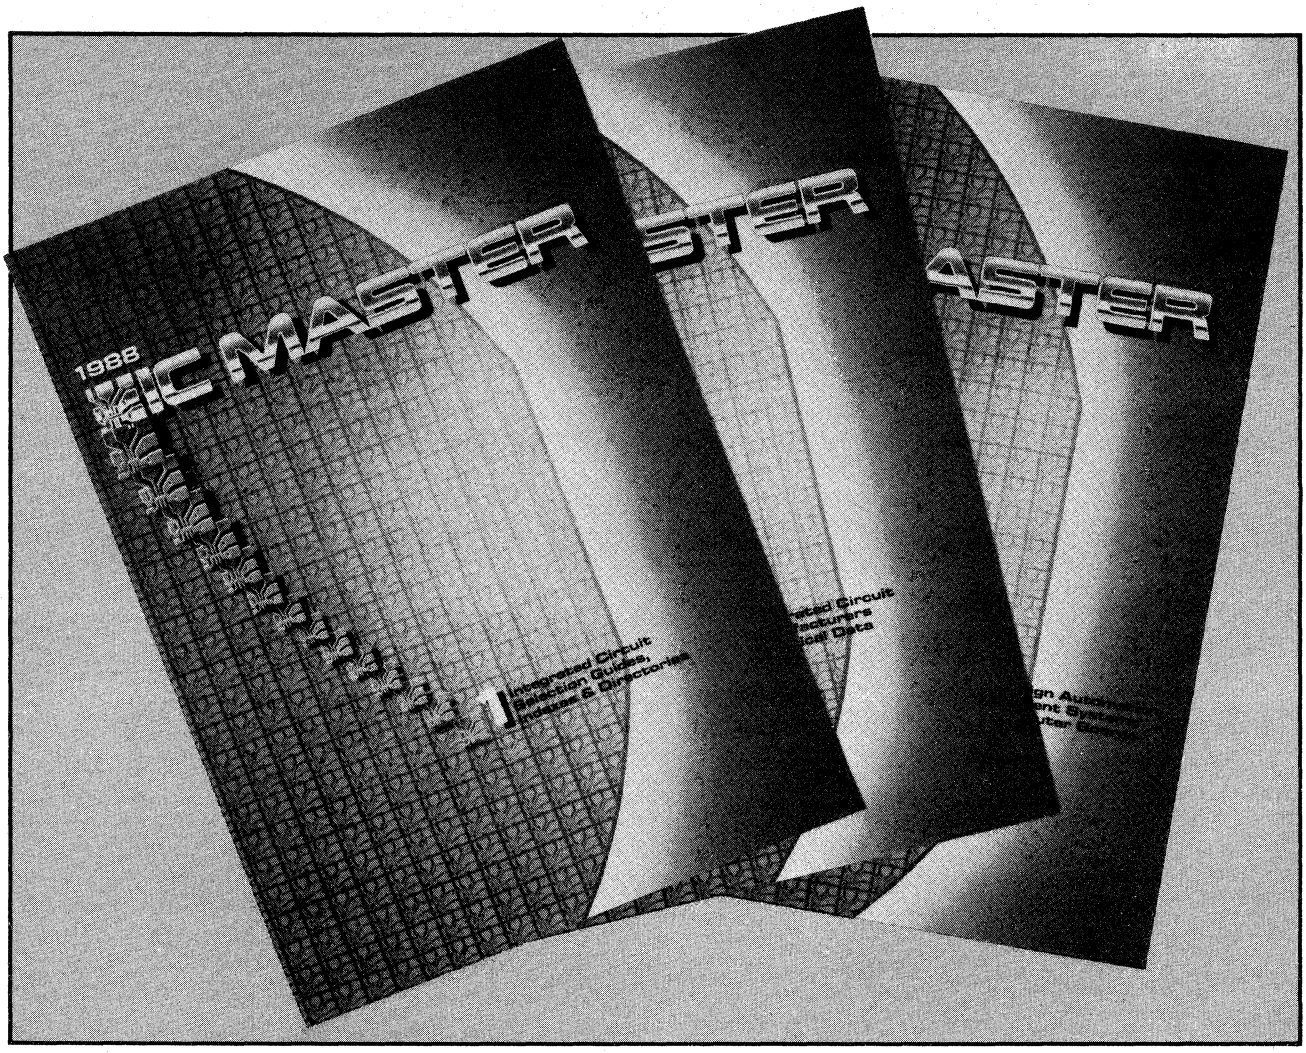
Having trouble deciphering a part number? No problem. Look in the Master. Part numbering systems are explained here.

Need to contact a manufacturer's local sales office, rep or distributor? It's faster with the Master.

If your question is about integrated circuits and you don't have the IC Master now, you are wasting time and money.

Order your IC Master now. Call 516/227-1300. The operator will answer, "Hearst Business Publishing." Ask for Marie Botta. Tell Marie you need the Master. Marie will tell you how to get your own copy fast.

Hearst Business Communications, Inc., 645 Stewart Ave., Garden City, NY 11530.



LOOKING FOR IC's?

Having trouble finding a particular integrated circuit? If so, you need the IC Master. The IC Master lists all commercially available integrated circuits by function and device number. If it's out there, it's listed in the Master.

Need an alternate source for an IC you already know about? If there is one, it's listed in the Master. Can't understand a part number. Look in the Master. The answers are there.

The all-new 1988 IC Master makes finding the IC you need easier than ever. All of the IC selection guides are located in Volume One. Manufacturers' data sheets are now in Volume Two. Volume Three covers ASICs, Design Automation, Microprocessor Development Systems and Microcomputer Boards.

All it takes to get your personal copy of the 1988 IC Master is a telephone call to 516/227-1300. When the operator answers, "Hearst Business Publishing," ask for Marie Botta. Tell Marie you want to save time and trouble. Tell her you want the new IC Master. She will tell you how to get this marvelous reference work. You can charge the books to your VISA or Mastercard. If you want to order by company purchase order or personal check, Marie will tell you how to do it.

Can't wait for the new 1988 Master? A few copies of the 1987 IC Master are still available. Call Marie and find out how you can get a discount on the 1988 Master by ordering the 1987 edition now.

Remember . . . Engineering designs begin with the IC Master.

Hearst Business Communications, Inc., 645 Stewart Ave., Garden City, NY 11530.

EDN MINIGLOSSARY CONNECTORS

Connector terminology is often quite confusing. This confusion starts with the very names of connectors. The name of a connector may derive from its shape, application, type of conductor or even method of termination.

Shape—Circular, cylindrical, and rectangular.

Electrical application—High voltage, RF, microwave, input/output, etc.

Mechanical application—Printed circuit, rack & panel, cable, etc.

Conductor type—Coaxial, flat cable, ribbon cable, flex circuit, etc.

Termination method—Wirewrap, soldercup, solderless, etc.

Hardware such as clamps, hoods, and adapters are frequently used to convert cable connectors to rack and panel types. This adds to the name confusion. A very common telephone connector, for example (the "C" type) got its name from the model number of the original maker.

Contact: The part(s) of the connector that actually provides circuit continuity between its two sections—the parts which are normally mated. The back end of the connector should properly be called the *termination*. This is the point where the wires or PC board is attached to the connector.

Contact alignments: Often called *contact float*. Describes the amount of allowable contact movement within the connector body. Permits self-alignment.

Male vs. female: In the U.S. this describes the contact construction. In Europe this term is more often used to describe the outer shell mating action which may be the reverse of the contacts.

Closed entry: A female contact which prevents entry of a male contact larger than a specific size.

Open entry: A female contact designed for a specific size of male contact but which will allow entry of larger male contacts by spring action.

Hermaphrodite: Contacts or connector bodies which are the same configuration. Male/female designations do not apply. Bodies usually have some mechanical means for maintaining polarity.

Hermetic seal: Glass-to-metal seals at terminations. Often used improperly to describe vacuum-tight seals.

Waterproof seal: May or may not be truly *waterproof*. May prevent easy entrance of casual water by means of a rubber or other boot.

Printed circuit connector: Connectors which are used in conjunction with printed circuit boards. There are two distinctly different styles.

Edgeboard. May be called *edge* or *card*. The printed circuit (PC) board edge enters the connector.

Two-piece: One part of the connecting pair is physically attached to the PC board itself. The other part is attached to something else such as a cable or a motherboard.

Readout: Describes the arrangement at the terminating edge of a PC board. May be single or double. A double readout PC board has termination strips on each side not usually interconnected.

Ribbon connectors: A type of connector which allows flat "ribbon" cable to be attached to a round or rectangular connector but also used interchangeably for flat connectors to flat cable.

Ribbon contact connector: Describes the contacts in a rectangular connector which have a self-wiping mating action. Not the same as ribbon connector.

Solderless terminal: Any style of termination which does not require solder for a permanent connection. See *crimp* and *insulation displacement*.

Crimp termination: A stripped wire is inserted into a barrel or trough which is then crimped to the conductor with a suitable tool.

Insulation displacement: Unstripped insulated wire is fitted into a channel containing metal teeth which are forced through the insulation to make contact with the conductor.

Service rating: The maximum rated voltage and/or current which may be applied continuously. May be called *working voltage*. Can be confused with the term used to describe how many times a connector may be mated and separated.

Withstanding voltage: Also called *test voltage*. The voltage a connector must withstand for one minute without breakdown. Applied between connectors and between connectors and shell and any grounding devices of the connector.

MINIGLOSSARY ENCAPSULATION

MATERIALS/HANDLING

Catalyst: A substance which changes the *rate* of chemical reaction. Very small quantities can cause fast change.

Conformal coating Sprayed or dipped. A thin conformal jacket which protects an assembly from moisture or other degrading environments.

Curing agent: See catalyst.

Hardener: See catalyst.

Hermetic: A permanent gas-tight seal.

RTV: Room Temperature Vulcanizing. Associated with silicone rubber sealants which vulcanize at room temperature.

Thermoplastic: Plastic materials which can be made to flow *repeatedly* with the application of heat.

Thermosetting: Plastics which once cured cannot be made to flow again.

Thixotropy: The property of a coating compound which has low viscosity when agitated, but which thickens when the agitation ceases.

Viscosity: Measured in units of *poise* or *centipoise*. The property of a liquid which resists internal flow. Low viscosity equates with thin and vice-versa.

PROCESSING

Casting: Parts or assemblies are placed in a mold. Encapsulating material is added and cured. Part is then removed from the mold.

Dip coating: Part or assembly is dipped into the encapsulating material. Final thickness is determined by number of dips, viscosity, rate of withdrawal, and temperature.

Embedding: Wherein an encapsulant substantially fills all voids in and about an assembly.

Impregnation: A process of encapsulation involving evacuating all air and then allowing the encapsulating material to flow in and fill all voids.

Molding: Similar to casting except this process usually implies multicavity molds and costly machines.

Potting: Wherein the part or assembly is immersed in an encapsulating material contained in a shell which becomes a permanent outer surface after curing.

DIELECTRIC

Arc resistance: An encapsulant's resistance to the formation of a conductive path or track. Measured in time.

Breakdown voltage: The voltage at which an encapsulant fails electrically.

Capacitance: The property of conductors and dielectrics which allows the storage of an electrical charge when the voltage is applied.

Corona: A luminous discharge of electricity due to air ionization when a certain voltage is reached. Can be internal or external. The formation of ozone can cause rapid deterioration of certain materials.

Dielectric: Insulator (Nonconductor.)

Dielectric constant: The property of a material that determines its ability to store electrostatic energy.

Dielectric strength: The ratio of dielectric breakdown to the thickness of insulating material.

Dissipation factor: The ratio of a dielectric material's energy losses.

Flashover: Point at which an electric discharge occurs around an edge or across a surface. Can result in a carbon track and permanent degradation.

Insulation resistance: (IR) An insulating material's total DC leakage.

Surface resistivity: The resistance of the surface of an insulating material to the flow of direct current.

Voltage endurance: Sometimes called corona resistance. The ability of a material to withstand the application of sustained high voltage.

Volume resistivity: The resistance of a material to direct current flow as a measure of volume. Expressed as ohm-centimeters.

24 PAGE PRODUCT INDEX BOOK LISTS 3,800 ITEMS

62 CROSS REFERENCE CARDS

300 FILE FOLDER LABELS

ALL NEW with this edition of EEM

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with The System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $5.00 for postage and handling. An invoice will accompany your System.

Don't waste any more time. Get organized now!

EEM FILE SYSTEM,
645 stewart ave., garden city, ny 11530

88 Manufacturers and Sales Offices Directory

Each manufacturer is listed alphabetically with complete address and telephone number of main offices. The names of those with data pages in this edition of EEM are shown in boldface.

Many manufacturers also show TWX and Telex numbers, FSC (Federal Supply Code), other pertinent company data, their sales and/or local distributor offices and phones. The page numbers of their data pages in this edition are shown in all volumes.

Advertisement

Our line of turnable RF coils affords highest Q and stability in filter applications from audio thru VHF. Values of .027 to 100,000 uH spaced in a 10% series have overlapping turning ranges. We also make wideband matching transformers, power splitter combiners. Directional couplers, audio transformers, fixed and tunable filters. We will also design and fabricate any of the above items to your specific requirements.
